Work Experience

Project Manager | Senior Web Developer

[Skaalab | Software developement](#)

Ben Aknoun - Algiers / Jun. 2023 - Now

Implementation of Standard Operating Procedures (SOPs), optimizing processes for enhanced operational efficiency. Played an integral role in software development, focusing on marketing automation and campaigns. Leveraged technical expertise to create solutions that facilitated effective campaign management and automation. Utilized various tools and technologies to optimize marketing strategies. Collaborated with cross-functional teams, ensuring streamlined communication and alignment for the achievement of project milestones. Encompassed both process enhancement and software innovation, contributing significantly to overall project and operational success.

Senior Software Engineer

[Beyn | Fintech , Software development](#)

Cheraga - Algiers / Dec. 2022- Jun. 2023

Developing applications for the digital banking sector. led the creation of an eBanking account opening app, streamlining how customers initiate their banking relationships online. I also contributed significantly to a credit application app, simplifying the process for users applying for credit. Utilizing PHP Laravel 8 and Vue.js 9.x, I ensured the seamless functionality of both front-end and back-end systems. Through the implementation of Jenkins, automated the build and deployment procedures, enhancing efficiency. Within an agile framework using Jira, facilitated communication among teams, enabling adaptability and timely software delivery.

Web Developer

[Instant System SAS – Mobdev | Software development (MaaS)](#)

Nice – Côte d'Azur (Remote: Algiers) / Aug. 2022- Dec. 2023
